

Scenario:

You are a new freshman student athlete at the University of South Carolina. You are excited to finally be in college, but you do not know where to start. You would like to first find some activities that suit your active lifestyle.

Task 1: Choose some of your favorite hobbies you would enjoy doing in college.

Task 2: Choose the times in which you are projected to be free.

Task 3: Okay your perfect schedule.

Notes

What changes should be made to application?

- Application does not give enough hobby options.
- Application does not have a location function.
- Application doesn't allow you to effectively coordinate hobby with time slot.
- Application scheduling is not optimal.

What should remain the same for application?

- Application has good hobby options.
- Application has continue and back features.
- Application is easy to understand
